

Specimen Stock

It is needless for us to mention that all our stock is of specimen quality, grown under constant clean cultivation and organically fertilized. It is heavily sheared stock and represents a beautiful package. It is produced in this Northern Section of this country and therefore as hardy as it can be.

All our Rhododendrons are grown without shade and are well budded. They are either cuttings, layers or grafts and are true to name.

	each	each
	per 10	per 100

RHODODENDRON c. grandiflora, most attractive Rhododendron plant when fully budded.
